

# TORANA '1600' OHC DELUXE IT'S GOT A DARNED CHEEK

Touch the accelerator and you know that this is something special. This is action! Feel the response of the big 1600 cc engine with overhead cam . . . the mover that has motoring writers searching for new superlatives.

It's a smooth groove all the way. Four-coil suspension flattens the roughest road, with high-rating front springs for even better handling. Big 6.20 x 12 4-ply tyres sit you down fat and firm. Power-assisted discs up front give you stopping power to match the going power.

Gear up any way you want it. The fast short-throw 4-on-the-floor manual change is standard, but you can also choose the drive-easy 'Tri-matic' automatic, now smoother than ever, with new, positive electrically controlled kickdown for brisk acceleration when overtaking.

The ride's as easy as the drive. Stretch your legs on thick wall-to-wall carpet; sink back into deeply padded bucket seats with adjustable head restraints; enjoy fingertip heating/demisting . . . every luxury is standard equipment. Torana 1600 cc overhead cam. Give some cheek to the big ones!
